*Sampling Instructions*

Choose 10 plants at regular intervals along two diagonal transects across the plot.

Examine the plants closely for pests, diseases and farmers' friends.

Name(s) of Pest(s)/Disease(s) seen	Total number of pests seen or number of diseased plants (None, few, moderate, many)	Damage caused (None, light, medium, heavy)	Part of plant damaged

--	--	--	--

Name(s) of Farmers' Friend(s) seen	Number seen in 10 plants(actual number)

Collect two examples of each type of pest, disease and farmers' friend and place each type in a separate tube for later identification
