

Pictograms for Safe Handling

Much of the information contained on the label should also be represented by pictograms. Pictograms are simple illustrations designed to help illiterate or partially illiterate users understand the minimum precautions to be taken when handling or using pesticides. Although they are intended to be readily understandable, they are not always interpreted correctly.

The following points should be kept in mind to be effective in using pictograms to educate pesticide users:

- Pictograms are intended to supplement the existing text on labels, not to replace it.
- A few pictograms should be used rather than many in order not to confuse the pesticide user.
- Only essential pictograms are selected by ranking the warning and advice messages in their order of importance.
- The use of pictograms should not conflict with national regulations.

Sample Pictograms

Storage Pictograms

Keep locked away and out of
reach of children

Activity Pictograms

Handling liquid concentrate

Handling dry concentrate

Application

Advice Pictograms

Wear gloves

Wear eye protection

Wash after use

Wear boots

Wear protection over nose and mouth

Wear respirator

Wear overall

Wear apron

Wear faceshield

Warning Pictograms

Dangerous/harmful to animals

Dangerous/harmful to fish
- do not contaminate lakes, rivers, ponds or streams
